To Calculate Carb Choices:  
Divide total grams of carbohydrate by 15.  
Example:

2.  $22 \div 15 = 1.47 \rightarrow$  Round to 1.5
3. Therefore 22 g carbohydrate is 1.5 Carb Choices.

This number is the weight of the crackers, NOT the amount of carbohydrates in the serving.

Count the total carbohydrates (per serving).

Do not count sugars separately because they are already counted as part of total carbohydrates.
